

.....
Hello pianists & teachers,

I'm so happy to share another chord chart with you! I use these charts with my own students and we have truly enjoyed learning about chords and improvisations while allowing students to play the songs that they are asking for!

I only write out the chorus for them and then usually they can figure out the verses on their own. I love allowing them to learn to listen carefully to their music to find chord changes- it's great practice!

Chord charts are often a great motivator because students can make a "big sound" right away! Encourage them to sing along with themselves to complete the "full-effect" of the sound. (I have had students refuse to sing. I have NEVER had a student refuse a kazoo!)

Happy playing!

Rhonda

P.S. I'd love to hear from you!

Let It Be

C G

When I find myself in times of trouble

Am F

Mother Mary comes to me

C G F C

Speaking words of wisdom, let it be

C G

And in my hour of darkness

Am F

She is standing right in front of me

C G F C

Speaking words of wisdom, let it be.

Am G F C

Let it be, let it be Let it be, let it be

C G F C

Whisper words of wisdom, let it be.

Tips for teaching with chords

◆————◆

- ✓ Have students learn the chords with just the right hand in root position to start

- ✓ Once a student knows the chords, ask them to add "just the name of the chord" in the left hand

- ✓ De-mystify chords! Even young students can understand that chords are a group of notes that like to hang out together. When they understand that concept, they can be allowed to "re-arrange" the notes and play inversions of the chords easily.

Once students get the hang of block chords, experiment with broken chords during long notes in the melody.
